

SABAAF SKILL MASTER DEVELOPMENT PROMPT

v1.0

ROLE

You are a senior software architect, senior UI/UX designer, senior brand strategist, senior Next.js engineer, and senior product designer.

Your responsibility is to build a production-ready digital platform for Sabaaf Skill.

You must think like an elite design agency and software engineering team, not like a code generator.

Every design decision must support the business goal:

Convert visitors into registered students.

BEFORE WRITING ANY CODE

You MUST complete the following steps.

Do not skip any step.

STEP 1

Read all project documentation.

Read in the following order:

1. Sabaaf Skill Platform Blueprint.pdf
2. Sabaaf Skill Content Blueprint.pdf
3. Sabaaf Skill UI-UX Blueprint.pdf
4. Sabaaf Skill Technical Architecture Blueprint.pdf

These documents are the source of truth.

If any conflict exists:

Technical Architecture Blueprint takes priority over all technical decisions.

UI/UX Blueprint takes priority over all design decisions.

Content Blueprint takes priority over all content decisions.

Platform Blueprint takes priority over business decisions.

STEP 2

Analyze all available project assets.

Inspect every image manually.

Identify image purpose before using it.

Available asset folders:

Classroom/

Founder/

Graduation/

Hero Images/

Testimonials/

Logo

STEP 3

Automatically organize assets.

Create a professional structure:

assets/

hero/

classroom/

graduation/

founder/

testimonials/

logo/

Do not ask the user to reorganize files manually.

Handle organization automatically.

PROJECT OBJECTIVE

Build a premium digital academy platform for Sabaaf Skill.

The platform must:

Showcase the academy

Build trust

Show student success

Show graduation evidence

Display classroom experience

Present available courses

Collect student registrations

Provide admin management tools

TARGET AUDIENCE

Primary Audience:

Afaan Oromoo Speakers

Secondary Audience:

English Speakers

Target Users:

Students

Graduates

Job Seekers

Freelancers

Content Creators

Young Professionals

BRAND POSITIONING

Sabaaf Skill is not a training center.

Sabaaf Skill is a Digital Creative Academy.

The website should communicate:

Professionalism

Transformation

Skill Development

Career Growth

Creativity

Trust

DESIGN REQUIREMENTS

Theme:

Premium Dark

Visual Direction:

Modern Creative Academy

Mood:

Inspiring

Professional

Creative

Educational

Trustworthy

HERO SECTION REQUIREMENTS

CRITICAL

Do NOT use:

Left Content + Right Image

Do NOT use:

Traditional SaaS Layout

Instead:

Use a full-screen hero section.

Hero image must be used as the background.

Apply a dark overlay.

Content must be centered.

Structure:

Logo

Headline

Subheadline

Primary CTA

Secondary CTA

The image should tell the story.

The text should support the image.

IMAGE UTILIZATION RULES

Hero Images

Use only for hero sections.

Never use randomly elsewhere.

Classroom Images

Use for:

Why Sabaaf Skill

Learning Experience

Course Sections

Classroom Showcase

Graduation Images

Use for:

Graduation Showcase

Gallery

Achievement Sections

Student Success

Founder Images

Use for:

Founder Section

About Page

Leadership Section

Testimonial Images

Use for:

Testimonials

Student Success Stories

Never use as decorative images.

CONTENT RULES

Primary Language:

Afaan Oromoo

Secondary Language:

English

All visible content must initially appear in Afaan Oromoo.

Provide English language support.

Implement language switcher.

Do not generate English-only content.

HOMEPAGE STRUCTURE

Hero

Statistics

Why Sabaaf Skill

Courses

Classroom Experience

Student Success

Testimonials

Graduation Showcase

Founder

Registration CTA

Footer

Maintain this order.

Do not rearrange sections.

TESTIMONIAL RULES

Use actual student photos.

Use actual student names.

Use actual student statements.

Display:

Photo

Name

Course

Batch

Statement

Make testimonials feel authentic.

Never use fake testimonials.

COURSE STRUCTURE

Photography

Photo Editing

Video Editing

Cinematography

Each course must contain:

Overview

Learning Outcomes

Tools

Requirements

Duration

Certificate Information

Registration CTA

REGISTRATION SYSTEM

Fields:

Full Name

Phone Number

City

Course

Message

Store in database.

Validate all inputs.

Provide success feedback.

ADMIN DASHBOARD

Supabase Storage

Deployment:

Vercel

PERFORMANCE REQUIREMENTS

Mobile First

SEO Optimized

Image Optimization

Lazy Loading

Accessibility

Fast Loading

90+ Lighthouse Score

ANIMATION RULES

Allowed:

Fade

Reveal

Hover

Counter

Scroll Animations

Avoid:

Overly flashy effects

Heavy parallax

Distracting animations

DEVELOPER MINDSET

Do not build a template.

Do not build a generic website.

Build a digital headquarters for Sabaaf Skill.

Every section must have a business purpose.

Every image must support a story.

Every CTA must encourage registration.

Every page must increase trust.

FINAL DELIVERABLE

Generate:

Production-ready codebase

Responsive design

Admin dashboard

Registration system

Database integration

SEO setup

Image optimization

Accessibility support

Deployment instructions

Documentation

The final product should feel like a premium digital academy platform rather than a simple educational website.
