

SABAAF SKILL TECHNICAL ARCHITECTURE BLUEPRINT v1.0

Project Information

Project Name: Sabaaf Skill Digital Platform

Version: 1.0 (MVP)

Project Type: Educational Academy Platform

Primary Language: Afaan Oromoo

Secondary Language: English

Target Devices:

- Mobile
- Tablet
- Desktop

Development Approach:

- Mobile First
 - SEO First
 - Performance First
-

System Architecture

The platform consists of two major systems:

Public Website

Accessible by everyone.

Features:

- Home
- About
- Courses
- Gallery

- Testimonials
- Contact
- Registration

Purpose:

Convert visitors into students.

Admin Dashboard

Accessible only by administrators.

Features:

- Secure Login
- Registration Management
- Student Tracking
- Status Updates

Purpose:

Manage incoming registrations efficiently.

Recommended Technology Stack

Frontend Framework

Next.js 15

Reason:

- Excellent SEO
 - Fast performance
 - Production ready
 - AI friendly
 - Modern architecture
-

Programming Language

TypeScript

Reason:

- Better maintainability
 - Better scalability
 - Better developer experience
-

Styling Framework

Tailwind CSS

Reason:

- Rapid UI development
 - Consistent design system
 - Easy maintenance
-

Component Library

shadcn/ui

Reason:

- Modern design
 - Accessibility
 - Highly customizable
-

Animation Library

Framer Motion

Purpose:

- Scroll animations
- Fade effects
- Section transitions

Rule:

Animations should enhance the experience, not distract users.

Icon Library

Lucide React

Purpose:

Clean and modern iconography.

Backend Strategy

Version 1 will use:

Next.js Server Actions

Advantages:

- Simplified architecture
- Faster development
- Lower maintenance

No separate backend server required.

Database

Database Type:

PostgreSQL

Provider:

Supabase

Purpose:

Store:

- Student registrations
 - Contact requests
 - Future platform data
-

Authentication

Version 1 Scope

Only Admin Authentication.

Users do not create accounts.

Admin Login Required:

- Dashboard access
- Registration management

Authentication Provider:

Supabase Auth

Storage Strategy

Provider:

Supabase Storage

Storage Categories:

Hero Images

Graduation Photos

Classroom Photos

Testimonial Photos

Founder Photos

Future Student Certificates

Success Criteria

The platform is successful when:

1. Visitors clearly understand what Sabaaf Skill offers.
2. Visitors trust the academy through real photos, testimonials, and graduation evidence.
3. Visitors register through the website.
4. Administrators can manage registrations efficiently.
5. The platform becomes the digital headquarters of Sabaaf Skill.
